- Cyber Threat Analysis
- Incident Response and Mitigation
- Hardware Asset Management (HWAM)
- Endpoint Detection & Response (EDR)
- Help Desk Support
- Graphic Design and Website/Software Development
- Penetration Testing
- Data Analysis
- IT Governance
- Build and Deploy SIEM Solutions

PAST PERFORMANCE

HHS Administration for Strategic Preparedness and Response (ASPR) Office of Information Technology (OIT) Responsible for planning, designing, and implementing Zero Trust Architecture by identifying vulnerabilities, gaps, and risks within the current framework. We assist with defining policies and procedures to ensure the organization's network meets industry standards as well as implementing a robust Identity and Access Management (IAM) solution to manage user identities, privileges, and access controls.

Pension Benefit Guaranty Corporation (PBGC) Provided subject matter expertise in the development of modeling Enterprise IT Governance processes and graphic design, representations, and visual aids to support the Enterprise IT Governance team utilizing tools such as Adobe Creative Cloud Suite, Visio, PowerPoint, and more.

Department of Homeland Security (DHS) - Multiple Contracts. Servicing networks for several federal agencies providing vulnerability management of the DEFEND E continuous diagnostics and monitoring (CDM) solution delivering cybersecurity capabilities and tools that assess and identify cyber risks on an ongoing basis, prioritizes those risks, and enables personnel to mitigate the risks. We are responsible for analyzing, designing, programming, installing, and maintaining cybersecurity tools, repairing hardware, collaborating with IT teams, performing upgrades, monitoring computer systems, and providing help desk support to non-technical staff.

Bureau of Engraving and Printing (BEP) OCIITS Cybersecurity Support Services Support Services to include tasks such as performing Security Incident Event Management (SIEM) services aligned with NIST standards; architecting and managing cybersecurity tools; analyzing, designing, and implementing security plans and procedures. We are responsible for reporting any known vulnerabilities and recommending remedies, identifying risks to the production environment associated with system additions, changes, or modifications.

DIFFERENTIATORS

Technology: We focus on developing robust, secure, and stable technology solutions for organizations. By incorporating common sense solutions into seemingly daunting deliverables, we can ensure at the start of the project that we will safely deliver the product to completion.

Quality: Quality and customer satisfaction are monitored, and problems are resolved quickly. Creative Visions is reliable, performs highly and is prepared to do this for every contract.

Our People: Creative Visions is located in the Washington, DC Metropolitan Area, and our people have extensive experience providing services for the federal Government. We are loyal to our customers and committed to surpassing all requirements and expectations.
